

How to activate Microsoft products

1. Obtain software from olga

2. Activate UT licenses using this address: <https://vpn.utexas.edu/>
3. Log in with your EID to begin the process of installing the Cisco AnyConnect Secure Mobility Client. This is normally used for off-campus computers that connect to locally managed servers, or other things on the UT network.
4. When the Cisco Client is installed, launch it, input 'vpn.utexas.edu' as the server address and log in with your EID and password
5. After connecting, attempt to activate the Microsoft product in question. With Windows, this would be in the System Information menu, and with Microsoft Office, this would be in the 'Account' menu.
